After successful signin, user will be redirected to UDR Explorer screen where they can see videos, music, news and radio section on swapping the screen left to right and vice versa

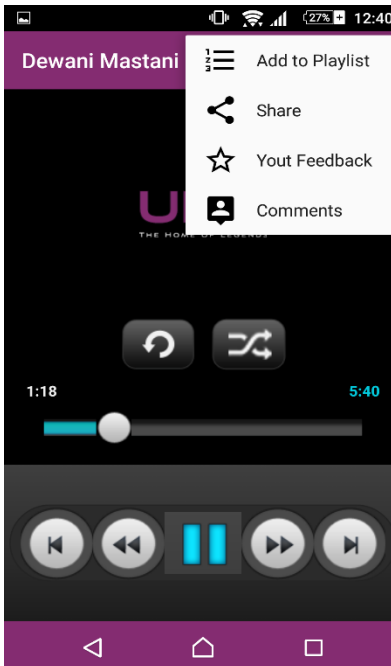

On video section, complete list of available videos will be displayed. Users can click on video which they want to see. After this video will be played either in landscape or in portrait mode depending on screen orientation

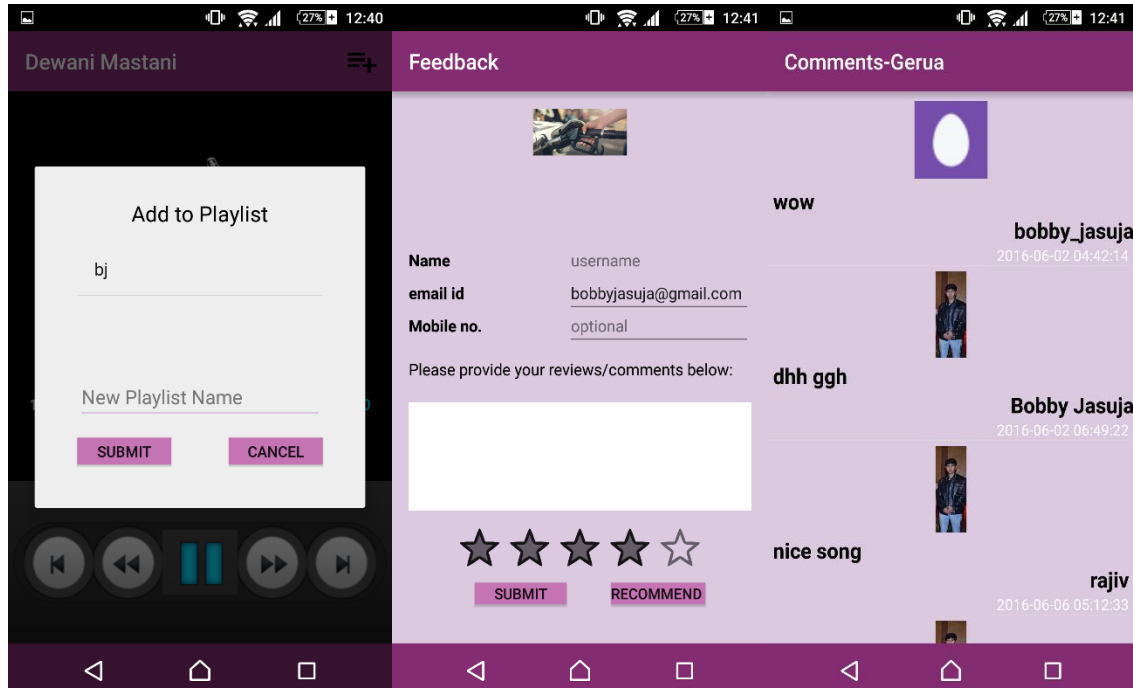

Similarly users can browse news section, radio section and music section.

On playing audio in music section, user have following options using setting button available on top right corner of screen-

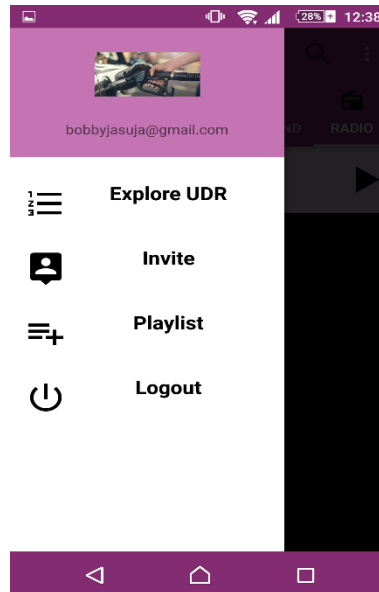

- 1.) Add to playlist
- 2.) Share music
- 3.) Review/Recommend
- 4.) View Comments/review

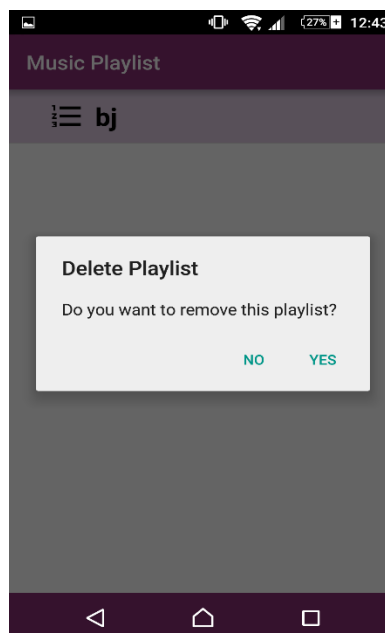

In add to playlist alert dialog, users have option to add music to existing playlists displayed on screen or create new playlist. This section will be available only for premium users. In feedback section if user gives

4 or more star then only he/she will be allowed to recommend that song to his/her friends using various social platforms and email.

User can click navigation drawer available on top left corner of UDR explorer screen to invite friends , logout or listen music added to available playlists

Users can delete a playlist by long clicking it and selecting YES option from alert dialog. Similarly user can delete music from a particular playlist.

Document Checker App

This is a very simple app to reduce the workload of Nigerian traffic police and also useful in bringing some form of automation in document verification related to driving in Nigeria where around many different documents (such as driving license, hackney permit, insurance, ownership proof, police permit, tinted glass permit, VIO document, tyre expiration and many more) are required to be carried by driver while driving .

This app has two versions-one for driver i.e. Document Checker and other for Nigerian police i.e. Document Checker(Partner). Document Checker can be used by any vehicle owner to upload a copy of all documents mentioned above. This app shows the current status of document such as Under Verification, Not uploaded, Rejected, Verified and About to Expire. If documents are not uploaded, about to expire or rejected , driver can upload a fresh copy of documents for verification.

Document Checker(partner) app on the other side can only be used by Nigerian traffic police and its users are pre-registered by admin. This app helps traffic police to check status of all legal documents required by driver based on plate no. of vehicle. If driver has violated any rule or has invalid documents then traffic police officer can issue him/her a warning through this app. On three times violation of traffic rules, ticket (challan) can be issued through this app. Then driver has option either to pay money for violating rules or one of his/her documents can be confiscated by traffic police.

This app includes feature like voice recorder and playback, Text to Speech for evidence rendering when driver is issued ticket/warning.
